

KGATO PETERS

BAC STUDENT

Business Intelligence & Data Analytics Student

PROFILE SUMMARY

Ambitious and analytical Business Intelligence & Data Analytics student at Botswana Accountancy College. Practical experience in data cleaning, visualization, and predictive modelling using Python, Power BI and Excel. Seeking a Data Analytics internship to apply technical skills to business problems and deliver actionable insights.

RECENT PROJECTS

Sales Trend Analysis — Built interactive Power BI and Excel dashboards to analyse sales patterns and support promotional planning.

Predictive Modelling – U.S. Car Accidents — Developed classification models (Random Forest, Logistic Regression) in Python to predict accident severity.

Crime Dashboard — Designed a Power BI dashboard to visualise regional crime trends and identify hotspots for reporting.

Smart Water Analytics (Botswana) — Analysed water consumption data and presented dashboards with recommendations for conservation and billing improvements.

Sales Forecasting — Implemented ARIMA time-series forecasting in Python to project short-term sales and support inventory decisions.
